

RoofLogic™ Asset Manager

RoofLogic is a web-based, user-friendly computer software application that D. C. Taylor Co. uses to let facility managers quickly grasp the conditions of their roofs, and make informed decisions regarding roof repair, maintenance and replacement. This “knowledge base” can be especially important when roofing decision-makers are transferred or leave your company. RoofLogic helps you retain the institutional knowledge (the “what, why and when”) that is so important to your roofing decisions.

RoofLogic lets you track roof inspections, monitor completed work, manage and prioritize budgets, and keep complete histories for all your roofs. It provides full-color reports and gives you and your staff secure, online Web access to all your roof data.

RoofLogic features.

- Manage inspections, budget forecasts, repairs and replacements.
- Live, integrated CAD drawings. Everything you see on the drawing is connected to your roof asset data.
- Real-time true history and total activity archiving.
- Photo management features include Web optimization, albums, editing and annotation tools.
- Brilliant color proposals, including text, photos and drawings.
- “Roofer-friendly” report writer.
- Organized and simplified fingertip access to your roof information.
- Unique check-in / check-out feature organizes and manages external files, Word, Excel, PDF – almost any type of file.
- Import data from InfoRoof™ and other products.

D. C. Taylor Co. is one of the first roofing contractors to offer this new tool. We are proud to play a role in the development of RoofLogic software, and we believe our use of this program will be an important part of our roofing service package.

About D. C. Taylor Co.: With more than 50 years of commercial and industrial roofing experience, D. C. Taylor Co. provides responsible roofing, inside and out, by delivering expert roofing and roof retention services needed to keep its clients' facilities protected and secure.

D. C. Taylor Co. has more than 60 service and roofing crews and five service areas: Atlanta, Georgia; Cedar Rapids, Iowa; Chicago, Illinois; Concord, California and Phoenix, Arizona. The company has been ranked among the nation's largest industrial roofing contractors for over 20 years.

How can we save you time using RoofLogic Asset Manager?

- Allows newly assigned responsible individuals to quickly understand the history of all roofs at the facility. "The wheel does not need to be reinvented."
- Allows efficient planning and tracking of future roofing needs and budget forecasts for the facility.
- Information is quickly shared over the Internet with other facilities and D. C. Taylor Co.
- Budget information is easily shared at any time by facility personnel and approving authorities.
- Expenditures and system performance are easily tracked.

How can we save you money using RoofLogic Asset Manager?

- Historical project information, including warranty status, is not misplaced in paper files. This lessens costs associated with reroofing a project that would still be under warranty, or conducting repair activities that may void the warranty.
- Forecasting and planning roofing projects based on accurate information reduces the need and additional costs associated with emergency projects.
- Tracking planned maintenance and housekeeping activities reduces premature failures. Proactive inspection and maintenance correct small problems before they become larger.
- A planning tool to extend and maximize the life of your current roof systems, thereby lowering the total life-cycle cost of the roof.

D. C. Taylor Co. helps you lower the total cost of roofing by facilitating better and timely roofing decisions, reducing record-keeping costs and simplifying communications. The information we deliver through RoofLogic lets you and your facility managers focus on activities that generate profits for your company.
